**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102/103***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as anticipated by or, in the alternative, under 35 U.S.C. 103(a) as obvious over Hatular (US 6,184,660). The reference discloses a converter 24 received power from a battery 22 when the battery is made available to the circuit (see column 5, lines 23-26) and when the external power 42 is made available, it uses to power the converter and to charge the battery (see column 5, lines 55-60 and 65-66). The circuit includes switches 62 to regulate between charge and non-charge modes. Alternatively, it would have been obvious to one having ordinary skill in the art at the time the invention was made to have integrated the components into a single component, since it has been held that rearranging parts of an

invention involves only routine skill in the art. *In re Fridolph*, 50 CCPA 745, 89 F.2d 509, 135 USPQ 319.

### ***Allowable Subject Matter***

Claims 4-6 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Claims 7-22 are allowed over the prior art made of record.

### ***Response to Arguments***

Applicant's arguments filed 4/11/2007 have been fully considered but they are not persuasive. Applicant argues that the reference uses too many components to do the job of just one component as claimed. The Examiner disagrees. As can be seen in Applicant's own specification, the alternative embodiment also calls for multiple components to provide the same result as argued by Applicant. As further defined by Webster's dictionary, the term "integral" is meant to compose constituent parts making a whole, composite or integrated. Moreover, it appears that the unity or diversity of parts would depend more upon the choice of the manufacturer and the convenience than on the inventive concept.
